I had several email conversations with management at SSVEC and understand their position. What makes me upset is their arbitrary decision to implement a date to start their proposed change without first getting commission permission. It also makes me upset they took so long to take an action they deemed incorrect and now want to slam the users who saved their money to purchase a green system. We need to get more people on green systems and if you decide in their favor maybe you should also mandate they change the limit placed on a household system (currently at 10k) to allow the user to go green and help save the environment.

Subject: Docket # E-01575A-15-0312 SOLAR !!

Commissioners,

This will be the most important decision you will face during your tenure. No one believes that Solar Energy is bad, but You are being asked to Kill the Solar industry with your decision. The Federal government, the state of Arizona, And SSVEC strongly encouraged us to "go solar " with advertisements and large dollar incentives ! Now SSVEC is trying to turn non solar producers Against little guy , rooftop solar producers. This is unconscionable ! We believed what they said, now the bait and switch !! By doing the right thing, we are being made out as bad guys. For most of us, going solar was a huge decision, and a very large initial expense, even with the rebates. We did it because we believed we were doing the right thing for the future of our state and country.

Please do the right thing, Arizona and the Nation are watching.

Sir,
I ask that you reject the SSVEC proposal for increased rates. It does not reflect your voters request, nor common sense.
Sincerely,
William L. Hermes
